

4X4 DIFF COVER

Technical Guide

Harrop 4X4 Diff Cover - armoured protection for the harshest of terrains.

Engineered with protection and durability in mind, the Harrop 4X4 Diff Cover is cast from quality Nodular (Spheroidal Graphite) Iron, creating the ultimate protection against damage caused by rock, stump and channel impacts. Built to address deficiencies in the OE diff cover, the Harrop 4X4 Diff Cover provides protection for the differential unit; in turn increasing the durability of the differential, increasing oil capacity and overall diff housing stiffness.

Designed by the elite team of Engineers at Harrop Engineering, the Harrop 4X4 Diff Cover is cast at an Australian specialist Iron Foundry, painted and CNC machined onsite at Harrop. Available in red and silver variations, the Diff Cover fulfils the protection needs of touring and high performance off-road vehicles.

Components included

- Replacement diff cover
- All fasteners required for fitment including flange head bolts and M18 oil fill plug

Product specifications

- Armoured gusseted exterior
- Large oil volume
- Cast from Nodular (Spheroidal Graphite) Iron

Application guide

- Dana 44
- Nissan Navara D40
- Volkswagen Amarok

Nissan Navara - Harrop 4X4 Diff Cover
